

**WHO WANTS
A SIMPLE TEST?**

We Thought So.

The Power Test Experts

With over 30 years of power test expertise, customers trust us to deliver quality power test solutions that meet their cost, performance, and delivery expectations.

From catalog products to integrated solutions our expertise simplifies the test process of complex power test to ensure your product meets or exceeds performance and reliability needed for demanding power requirements.

Allocate your resources to what matters most, testing your product.

Intepro provides test solutions for a wide range of industries including:

- Aerospace
- Military
- Renewable Energy
- OEM Power Supply
- Automotive
- Power Components
- Industrial
- Telecommunications

Why Work with Intepro

Innovative Designs that Drive Performance

With access to thousands of catalog test and measurement instruments we develop unique test solutions that are cost effective without compromising performance. Our partnerships with leading suppliers allows us to take advantage of the latest technology and ensure long-term operability.

Extensive catalog instruments paired with our expert in-house engineering team means we can tackle the most demanding performance requirements.

What Intepro Offers

Intepro Test Solutions Include

Turn-key system for characterization, functional and accelerated power test for the following:

- AC/DC, DC/AC and DC/DC Power supplies
- Medical power supplies for MRI
- Battery test for EV and HEV
- Aerospace components, motor drive test and semi-conductor power devices
- Renewable energy inverters for on-grid or off-grid PV and bi-directional EV chargers

Legacy Upgrade or Replacement

- Form, fit and functional solutions to replace legacy test program sets
- Protect existing cables and test program sets
- Repurpose operational hardware and upgrade the rest

On Time, On Budget

Is on the top of the list for any company, Intepro doesn't stop there we factor in through-put, quality control, down time, servicing and expandability. This is why our systems are class leaders reducing cost of ownership while performing at a high level for many years of operation.

Let your resources focus on what they do best, let us solve the problem of design and building your ATE tester on time, on budget.

INTEPRO
SYSTEMS

THE POWER TEST EXPERTS

ML1800

AC Sources

Single or three phase manual and programmable AC sources with frequency up to 500Hz

- Power levels from 500VA up to 2MVA
- Utility grid and avionics power simulators
- Four quadrant, regenerating >90% of energy to the utility grid

Catalog Products

DC and AC Electronic Loads

Single or Multi Channel Loads

- DC loads from 300W to 6kW and AC loads from 60kVA to 1MVA
- DC regenerative loads
- Modular loads support multi-channel, synchronized control in a single chassis
- AC load, regenerating up to >90% of energy to the utility grid

PAS-F

Software

PowerStar Software™ Program without Coding™

- Eliminate the need for complex programming
- Quick and simple testing
- Seamless transition from design to manufacturing
- Hardware Independence test programs
- Executes existing LabView test sets

The Intepro Advantage

Universal Design Grows with You

Intepro's universal hardware building block approach optimizes operation and reduces risk.

- Simple transition from R&D to production
- One system tests multiple products
- Leverage existing system designs for your next generation product
- Model or brands of hardware is easily exchangeable
- PowerStar test suits are hardware independent

INTEPRO
SYSTEMS

THE POWER TEST EXPERTS

Services & Support

Peace of Mind Service You Can Count On

- No risk service and maintenance contracts available, know your cost of ownership up front
- ADD after maintenance contracts
- System document control packages
- Test program set development

Global Reach

Localized design, manufacturing and services

- We have support services in the US, Europe and Asia to service you
- Localized sales channel partners provides personal attention to your needs
